

ANCHITA BISWAS

Full Stack Developer | React | Node.js | MongoDB

Kolkata, West Bengal | Open to relocate | +91 9831914329 | anchitabiswas02@gmail.com
github.com/anchita-biswas | linkedin.com/in/anchita-biswas-dev | developer-portfolio-nine-livid.vercel.app

SUMMARY

Full Stack Developer working with React, Node.js, Express, and MongoDB. Built and deployed three applications. An event booking platform that never double-sells a seat, covered by 49 automated tests. A double-entry ledger API that keeps every transfer accurate and traceable. An AI tool that scores a resume against a job description and returns a prep plan. Seeking a Full Stack Developer role, open pan-India.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Java, SQL, HTML5, CSS3

Frontend: React 19, Next.js 16 (App Router), React Router v7, Context API, Vite, Tailwind CSS, Sass/SCSS, Axios, Single-Page Applications (SPA), Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control, bcrypt, Zod Validation, Helmet, Rate Limiting, Multer, CORS, Idempotency Keys, OOP

Databases: MongoDB, Mongoose ODM, ACID Transactions, Aggregation Pipelines, Schema Design, Indexing, SQL

Testing: Jest, Vitest, Supertest, React Testing Library, Integration Testing

Tools: Git, GitHub, Google Gemini API, Puppeteer, Nodemailer, Postman, Render, Vercel

PROJECTS

Eventora — Event Booking Platform

React, Tailwind CSS, Node.js, Express, MongoDB, Jest

github.com/anchita-biswas/Eventora | eventora-88bu.onrender.com

- Built an event booking platform with 15 REST endpoints, admin/attendee role-based access, OTP verification, and QR-code tickets.
- Prevented double-booked seats under concurrent load using atomic conditional seat updates with rollback on failure.
- Wrote 49 backend tests with Jest and Supertest, plus client tests with Vitest.

InterviewPrep-AI — AI Interview Preparation Platform

React, Node.js, Express, MongoDB, Google Gemini API

github.com/anchita-biswas/InterviewPrep-AI | interviewprep-ai-hazx.onrender.com

- Built an AI tool that scores a PDF resume against a job description and returns 10 questions, skill gaps, and a prep roadmap.
- Kept AI output reliable using Zod schemas as a structured-output contract for Gemini.
- Secured 8 REST endpoints with JWT httpOnly cookies, bcrypt, and a token blacklist on logout; deployed as one Node/Express service on Render.

Backend-Ledger — Double-Entry Ledger API

Node.js, Express, MongoDB, Mongoose, JWT

github.com/anchita-biswas/Bank-ledger-backend

- Built a double-entry ledger API writing paired DEBIT/CREDIT entries per transfer, with balances computed by MongoDB aggregation.
- Made transfers all-or-nothing using MongoDB ACID transactions, on an append-only audit trail.
- Blocked duplicate charges on retries using unique idempotency keys across four transaction states.

EXPERIENCE

Engineer (Assistant Central Coordinator)

Mar 2024 — Jul 2025

Lumino Industries Ltd., Kanpur, Uttar Pradesh

- Coordinated a Rs. 700 Cr government power distribution project (RDSS) covering 777 feeders across 16 divisions in 6 districts. Tracked execution to 93% completion and 43,698 new connections.
- Automated multi-district reporting with data reconciliation, cutting report preparation by 2 days per week. Tracked 10,000+ site quality observations and 240 right-of-way escalations with the client (DVVNL) and auditor (WAPCOS).

EDUCATION

Full Stack Development with AI — PW Skills, Kolkata | Aug 2025 – Present

B.Tech, Electrical Engineering — B.P. Poddar Institute of Management and Technology, Kolkata | Jul 2025 | CGPA: 8.16 / 10

CERTIFICATIONS

Full-Stack Web Development Bootcamp - Udemy (62 hours) | Decoding Java with DSA - PW Skills | Ethical Hacking - NPTEL

LANGUAGES

English, Hindi, Bengali
